

玻璃瓶灌装主机 GLASS BOTTLE FILLING MACHINE

KYGHF系列三合一组合机采用国际先进的灌装、封口技术，广泛应用于玻璃瓶饮料的生产。

KYGHF Series 3 in 1 machine adopts International advanced filling and sealing technology, applied in glass bottle beverage production.

主要结构特点

- 整机采用模块化设计，将各功能模块组合为易于操作的一体机。
- 该机内部采用优质SUS304不锈钢材质，外部采用钢化玻璃外罩。
- 人性化的操作面板，可实时监控、记录设备的运行情况，实现高度自动化运行。
- 温水冲瓶预热，有效降低瓶损。
- 微负压灌装，液面高度精确统一。
- 物料温度自动检测分析，高温报警，低温停止灌装，保证产品品质。
- 整机管路可实现自动CIP清洗。
- 采用恒扭矩磁力封口头，保证封口合格率。
- 瀑布式理盖系统，自动理盖，无盖损。
- 整机旋转、传动部位都进行密封设计，可随意水洗。

Main structural features

- The whole machine adopts modular design, each function module combination for all-in-one easy operation.
- The machine internal adopts high-quality SUS304 stainless steel material, external adopts toughened glass cover.
- The humanized operation panel, can monitor the real-time operation situation, records equipment operation, realizes the highly automated operation.
- Warm water bottles of preheating and effectively reduce the damage of bottle.
- Micro-negative pressure filling makes the liquid level accurate and unified.
- Material temperature automatic detection analysis, high temperature alarm, stop filling in low temperature, to ensure product quality.
- The machine line can realize automatic CIP cleaning.
- By constant torque magnetic seal oral, ensure the sealing qualification rate.
- The waterfall cap system, automatic cover, without cover loss.
- The whole machine rotation, transmission parts, seal design, can be washed.
